

Department of Computational Science, Maharaja Ranjit Singh Punjab Technical University, Bathinda is one of the university departments in Bathinda, Punjab, India to offer a two-year Master of Computer Applications (MCA) programme at the post-graduate level, dual-degree BCA-MCA, B.Sc. Computer Graphics and Web Designing at the graduate level. With a strength of Ph.D. research scholars, the department continually strives to conduct cutting-edge research in Image Processing, Computer Vision, and Machine Learning research areas.

Our goals are to give students the fundamental skills necessary to create high-quality software that is fit for production while also developing the expertise required to keep updated with cutting-edge technology.

The Department is proud to be associated with a large network of alumni, many of whom hold important positions in academia and industry related to information technology on both a national and international level. We welcome exceptional students, researchers, academics, and professionals to join us and contribute to the department's vibrant and competitive learning environment.

Best Wishes,
Prof. Sanjay Bhatnagar
Head of the Department
Computational Sciences, MRSPTU
