

## **Best Practices of the Department**

- **Research project and advanced lab with the aim of developing research aptitude in students**
- **Rotation of courses among faculty, enable teachers to get familiar with more than just their topics.**
- **The question papers are reviewed by committee constituted for paper assessment.**
- **Given the fact that students have multiple intelligences, we have designed our model of assessment to take on various forms like written, oral, multiple-choice, individual presentations and flip classroom.**
- **We have field trips to eminent research institutions and instrumentation laboratories to extend the theoretical knowledge to a hands- on experience.**
- **Industrial visits are organized to help students to understand the practical application of theoretical knowledge.**
